

## EverGreen Overview

EverGreen Data Continuity, Inc. – EverGreen provides “Total Business Continuity Solutions” for small, medium and large organizations who need to develop a business continuity – BC plan and implement a disaster recovery - DR program. With over 300 global clients and more than 12 years of BC/DR experience, EverGreen guarantees its business continuity plans, and DR hosting services. If you need help quickly and affordably resolving any of the following questions please contact us;

- Are federal regulators, business partners and stakeholders requesting to review your BCP?
- Are you confident you can maintain critical operations following a disaster and recover all customer data?
- Are you able to assess the business impact and overall effectiveness of your business continuity program?
- Are your staff trained in DR operations to maintain and recover business and IT procedures?
- Have you considered the economies of off-site DR hosting with managed services to reduce capital, protect data and reduce the impact of staff turn-over?

## Business Continuity Solutions

Today, organizations are required to have a business continuity plan - BCP that guarantees operational resiliency. The BCP covers both business and IT disaster recovery processes to define who, what, when, where and how to resume operations following any disruption of service. The EverGreen “Total Business Continuity Solution”;

- Identifies operational vulnerabilities and risks
- Recommends mitigation strategies
- Evaluates and recommends data recovery strategies
- Develops a BC/DR Plan for business and IT groups
- Includes EverGreen Award Winning Software
- Assists in testing BC/DR Plans
- Delivers complete BC Managed Services
- Hosts on-line BC/DR plans and associated documents
- Implements disaster recovery hosting solutions

## Why EverGreen?

### Experience, Expertise, and Customer Satisfaction

- Established and recognized as a Top Tier BCP provider by Gartner analysts and worldwide clients.
- Guaranteed business continuity plans integrated with DR hosting for compliance and operational resiliency.
- Award winning EverGreen BCP software, Sharepoint document management, and BC/DR Plan hosting included with each BC/DR Plan.
- Trusted BC/DR expertise for assessing, designing and deploying any aspect of BC/DR requirements.
- Client access to EverGreen BC/DR Plans is guaranteed
- EverGreen BC/DR strategies and services provide clients with IT disaster recovery for staff, servers, applications, networks, and data while reducing overall costs.

## Our Customers

EverGreen has over 300 customers ranging from startups to the worlds largest brands. The majority of our clients are government regulated and B2B organizations, and those who need to ensure their shareholders that a disaster will have a minimal impact on operations.

### Industry Segments (Clients)

- Financial Services (ex: LPL Financial, AM Bank Texas)
- Insurance (ex: Am Nat'l Family, DentaQuest )
- Healthcare (ex: Medco, Yale New Haven Hospital)
- Education (ex. U Mass, Georgetown U, N.Y. BOCES)
- Government (ex. Orange County CA, Maui County HI)

*“Our Goal is Exceeding Your Expectations”*

## Business Continuity Managed Services

The **PROTECT** Business Continuity Managed Service program is designed to streamline the Business Continuity Plan development process by using EverGreen's business continuity experts, effective data collection formats, and time-proven recovery planning procedures and proprietary software. EverGreen will manage, administer, and develop the BCP process while the client's resources provide the core data. This minimizes the client's resource involvement and provides significant value in terms of concise, informative and executable deliverables. All BCP documentation is packaged and managed using EverGreen's proprietary Business Continuity Management (BCM) software and hosted in EverGreen's secure data centers with 7\*24\* 365 guaranteed accessibility supported by Rackspace Hosting. The PROTECT service improves operational resiliency, mitigates knowledge loss from staff turnover, reduces cost, and protects critical information.

## Disaster Recovery Hosting

The EverGreen **DR Hosting** solution brings the combined expertise of EverGreen Business Continuity Planning and Rackspace DR Cloud Hosting to keep an organization running regardless of the disruptive event. This unique combination provides a Total Business Continuity and Disaster Recovery Solution designed to ensure the continuance for all critical operations to "Exceed Client Expectations".

## Business Continuity Software

EverGreen's Business Continuity Management (BCM) software solutions, **Mitigator** and **EverSafe** provide the software resources needed to support operational resiliency and continuous operations. Either solution is available as a stand-alone product or included with PROTECT Services.

**Mitigator** software assists with analyzing risks, recommending strategies and enabling the development of business continuity / disaster recovery plans. Mitigator also includes emergency notification and documentation management features to provide the industry's most comprehensive and affordable business continuity software. (*A Gartner Top-Tier BCM software solution*)

**EverSafe**, an on-line BCP SharePoint web portal designed for small and midsize organizations who need affordable business continuity and emergency management planning software. EverSafe is provided with secure BC/DR and Pandemic Plans templates, and full SharePoint capability.

Both Mitigator and EverSafe are hosted in EverGreen's Private Cloud Services supported by Rackspace Hosting with DR site High Availability.
